

Chicago TitleNow® App Version 2 is Available!

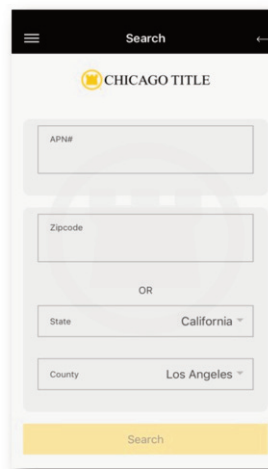

The newly redesigned Chicago TitleNow App – now with the latest technology available! Download the app today to see all the new features to help you save time and money.

New for 2018, we have released Version 2 of Chicago TitleNow. By updating the app, users can now take advantage of the latest technologies, offering a new look, while advancing the user experience with the ease of use.

What's New in Version 2

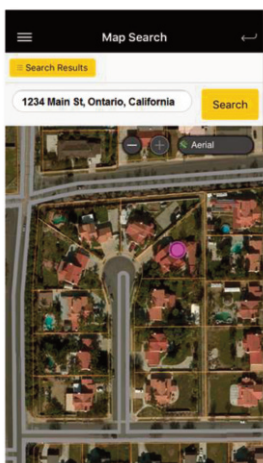

- **New user experience** with advanced technology making the Chicago TitleNow App quicker and easier. **New Menus:** Instead of the menus on the bottom, they are now on the side (*eliminating the **More...** button*) providing access to otherwise hidden options.

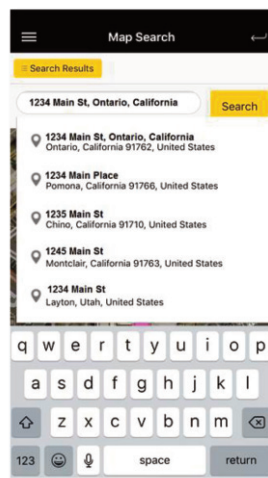

- **New intuitive fields** help speed up the property search experience. Where appropriate, we have filled in the County and State fields to eliminate unnecessary data entry.

Chicago Title Now

- Chicago Title has incorporated the **latest in mapping technologies** to help locate the exact property you're searching for. The Map Search feature also allows you to scroll anywhere on the map so you can find any property you need, next door or across town

- Using our new **Predictive Address Search** feature, we enable the user to select the property from a list of possible addresses before they've even finished entering it. This allows a more seamless search experience, coupled with pinpoint accuracy to ensure the correct property is found.
